

Dedication, commitment, passion . Those elements have been following Nick since he started his journey into the world of electronic music about 20 years ago. Throughout his residency at the iconic club Venue in his hometown Athens, it was Nick's combination of professionalism & genuine passion to the underground house movement, which enabled him to make his mark as a warm up dj for some of the biggest names in dance music. Regardless he found himself sharing decks with his idols in a fairly young age, he managed to contain his enthusiasm and deliver the dance-floor ready for the main guest to take over.

The quality of his selection skills got the attention from some of the heavy weights of the scene like Nick Warren; who named Nick Varon "the most underrated DJ in the world", in DjMag's Top 100. But it was Hernán Cattaneo who was mostly captivated by his well compiled forward thinking sets.

The South American legend initially invited Nick on his Greek Tours and long behold a partnership of music & talent - that still flourishes today - was created. Their collaboration has taken off with huge success in 4 continents (Europe/ America/ Asia/ Africa ). Up to now, the duo has accomplished more than 60 shows together, a number that barely represents the growing musical partnership but mostly a great friendship.

His international career keeps growing with shows from Bali to Amsterdam & from New York to Tokyo, while he has been also giving remarkable production signs. As a frequent now at the Sudbeat imprint and with an increasing amount of releases, builds an equally promising future on the production side as well.

Always loyal to the melodic - atmospheric elements - but with a continuous modernization along with his ability to blend endless styles of underground house music has created his own signature sound. A unique style, which got him playing with two generations legends; such as Sasha, John Digweed, Sven Vath, Dubfire, Solomun, Lee Burridge, Âme ... and thats truly a shortlist.

With shows in some of the most iconic venues around the world such as Crobar & Pacha in New York City, Mansion in Miami, Blue Parrot in Mexico, Cavo Paradiso, Scorpions & Alemagou in Mykonos, legendary festivals such as Creamfields ,BPM , Untold, or the ADE..and by constant presence within his residency at NOM - in his current base in Barcelona- he continues to deliver well structured intriguing sets making his worldwide fan base wider and even more faithful.

*\*Residencies 2022 - 2023*
